- Claims Process
- Cost Management
- Health Data & Wellness

- PAYOR SERVICES
- Disease Management & Prescription Adherence
- Access & Affordability

- PATIENT SOLUTIONS
- Community Pharmacies
- Clinics
- Pharmacy Academy

- CHANNEL SOLUTIONS
- Community Health
- Biopharma, Vaccines
- Medical Devices
- Animal Health
- Tender Management
- E-Commerce (web-based)

- DISTRIBUTION
- Pharmaceutical products
- Demand Generation
- Regulatory Services

- COMMERCIALIZATION
- Product Launches
- Demand Generation
- Regulatory Services
Pharmaceutical Distribution Model
Challenges in the Pharmaceutical Distribution Business

MANUFACTURERS (Local) and IMPORTERS

- Sales / Demand Generation / Ordering
  - Demand forecasting (expired meds, returns)
  - Government hospitals, Philhealth, DOH ordering

- Marketing

- Regulatory Services
  - Changes in rules and procedures in registration of medications thru the FDA
  - Bureaucratic red tape
  - Pharmacovigilance requirements (for generic manufacturers)
  - Good manufacturing practice compliance

- Big Manufacturers (Multinational Companies) vs Small Manufacturers
Challenges in the Pharmaceutical Distribution Business

WAREHOUSING / LOGISTICS / DELIVERY

- **Warehouse**
  - Property prices
  - Unforeseen events: fire, earthquake, calamities
  - Location and maintenance of warehouses
  - Cold chain management

- **Transportation**
  - Outsourced trucking services
  - Security on the roads (truck-jacking)

- **Infrastructure (ports, roads, airports)**
  - Port congestion
  - Urban planning

- **Insurance-related risk**
  - Consolidation of stocks
  - Losses (pilferage, etc.)
Challenges in the Pharmaceutical Distribution Business

CONSUMERS (Retail Pharmacies / Hospitals / Clinics / Doctors / Patients)

- Stocking in pharmacies and retailers
- Maintenance of cold chain (refrigerators, aircon)
- Issues with medications (safety, supply, quality and pricing) being addressed to the distributor instead of the manufacturer
DISTRIBUTION IN OTHER ASIAN COUNTRIES

- **Korea / Australia / NZ**: wholesaler market (different local market conditions) mostly retail (hospitals and pharmacies)
- **Myanmar / Vietnam**: No direct market access, full foreign ownership not allowed
- **Thailand**: Government preference to do its own pharmaceutical distribution
- **Indonesia**: Local manufacturers do their own distribution; Delivery to retailers in limited quantities (retailers do not want to carry stock)
Lessons Learned

- **Quality has always been the foundation of our sustainable business**
  - Quality in Facilities, Equipment, Technology, Systems, Processes and People
  - Avoiding short cuts
  - In short term, quality may seem costly but potentially tremendous savings in medium to long term while also strengthening business sustainability
  - Investments in cold chain, in SAP, in better sales force mobility

- **Initiatives that improve organizational agility, adaptability and alignment**
  - Having a regularly tested Business Continuity Plan for disasters, epidemics, port congestion and other sudden shifts in demand and market structure
  - Working with trade customers on how we can help develop joint BCP; possible sharing of data and system interfaces (etc)
  - Integrated Business Planning with partners allow for better joint demand forecasting. We have seen significant reduction in returns, expired stocks & other improved efficiencies
  - Regular market research and trade intelligence
Lessons Learned

- **Impact of climate change**
  - becoming an increasing concern
  - drives supply chain planning (# of warehouses; back ups for gen sets/connectivity; delivery of life saving drugs in cases of emergencies; warmer warehouse temperatures etc)

- **Being watchful and open to technology and digital innovations**
  - Improving data sharing & analytics
  - Making supply chain more efficient
  - We have started a long term digital strategy that includes e-commerce for our consumer healthcare products

- **Initiatives that bring wider access and availability of medicines have created the most value in our business and that of our partners**
  - Mass Vaccinations
  - Trade and Marketing Services
  - Commercialization Services
Lessons Learned

- Developing a culture of continuous efficiency, productivity and cost containment

- Organizational engagement must be high at all levels and at all times
  - measured by our Employee Opinion Surveys (Town Halls; Newsletters; Open Forums with Line Managers)
  - Regular reviews with partners.
- Volume of medicines used globally will reach 4.5 trillion doses and cost US$1.4 trillion by 2020

- Dramatic increase in utilization of medicines due to expansion of health systems

- 2/3 of volume will comprise of generic medicines

- Largest demand will come from emerging markets (including China, India, Indonesia and Brazil)

- ASEAN Harmonization will bring opportunities and pose challenges in regional distribution

The Future of the Healthcare Industry

Global Medicines Use in 2020, Outlook and Implications, IMS
Opportunities & Solutions
Specialty Solutions Group | Operations Model for Clinical Trial Drugs

Traditional vs Regional Distribution Center Model

SLOW, COMPLEX & EXPENSIVE  VS.  RESPONSIVE, SIMPLE & EFFICIENT

Traditional Supply Chain Model  VS  Regional Distribution Supply Chain Model
Philippines Digital Strategy | OVERVIEW

ePharmacist Portal
The knowledge & learning hub for pharmacists & pharmacy owners

B2C eCommerce
Pilot online eShop (Over-The-Counter Meds) in partnership with existing online marketplace

OFW/BPO Channel Expansion
Expand vaccination program as additional service (online booking & payment of consultations, vaccination services etc.)

Direct Corporate Channel eCommerce
Develop bespoke B2C eCommerce portal providing direct OTC Sales and prescription fulfillment to corporate employees.

ePharmacist Portal
Enhance ZP’s role beyond a transactional partner to the pharmacy channel

B2C eCommerce
Develop a key role for ZP in the online retail space as a distributor

OFW/ BPO/ Corporate Channel
Create new direct channel for product sales & services
The changing landscape of pharmaceutical distribution

- Emerging economies will be focused on providing access and essential medicines to those in need to close healthcare gaps.
- More of healthcare delivery will be technology-enabled, by providers other than doctors and pharmacies.
- Direct out-of-pocket cash payments will shift to insurance premiums as countries strive for universal healthcare coverage.
- Higher level of spending → higher revenues for manufacturers
- Delivery capacity must be expanded by increase in staffing, infrastructure and funding sources

CRITICAL ADAPTATIONS ARE NECESSARY FOR THE PHARMACEUTICAL INDUSTRY TO THRIVE IN THE NEXT DECADES.
